Translations

rubber output of the country. The majority of the crops produced come from Basilan Island.

In order for the province to sustain its status, the companies are encouraged to develop and improve their farming equipment using the most technologically-advanced farming system that can be adopted in this industry. However, most of the companies are small and do not possess the technology needed for the improvement and promotion of this industry.

At the recent Business Congress held in Lamitan on Basilan Island, the expansion of the rubber industry was one of the major concerns. Seeing the high probability of making this industry a major source of economic advancement for the people, the ARMM governor and the provincial government of Basilan encouraged the local planters and multinational firms to invest more in order to keep up with the demands of both local and international markets.

With the kind of attention and focus that the government of Basilan is giving to this industry, before long, the country will be able to compete in the world market and be able to realize the objective of making Basilan Province the "Rubber Capital of the Philippines." As a result, the rubber industry will become significantly influential in the improvement of the socioeconomic condition of the people, not just on Basilan Island, but in the entire Philippines as well.

31. Why We Fast

Last month, all of the Muslims in the world celebrated the holy month of Ramadan. Everyone was devoutly religious, performing all the recommended activities that should be done during this month. Fasting has been prescribed for all Muslims even during the times of the previous prophets until the time of Prophet Mohammad.

But what is fasting and why do Muslims so closely follow this command? Fasting is the abstention from food and drink and sex between spouses during the day. But, during the night, Muslims are allowed to eat, to drink, and, for the married ones, to have sex. More than these prohibitions, the most important reason a Muslim fasts is his total submission to the commandments of his Creator.

Because whatever the Creator has commanded, believers don't question their Creator because they know that the Creator knows what is good for His creations. There are plenty of concepts and lessons that a person can
